FOREWORD

This report provides supplementary data to the B-4 report Numbers of Recipients and Amounts of Payments Under Medicaid, Fiscal Year 1973 published in November 1975. The data were derived from Form SRS-NCSS-2082, Statistical Report on Medical Care: Recipients, Payments, Services. Forty-nine States, the District of Columbia, Puerto Rico and the Virgin Islands were responsible for completing the report form and submitting it to the National Center for Social Statistics. Colorado, Massachusetts, New York and Rhode Island did not submit reports at all and some States did not submit complete reports. National totals referenced in the text include all States and data are estimated for those States not reporting at all.

A previous supplemental report was published for fiscal year 1972.

Acknowledgement

This report was prepared by Henrietta Duvall and Annie J. Mayfield of the Medical Statistics Branch, National Center for Social Statistics. The computer programs for the tabulation of data were developed under the direction of Bernard Silverstein, Chief, Applications Support Branch, Division of Data Processing, Office of Information Systems.

HIGHLIGHTS

In fiscal year 1973, general hospitals, skilled nursing homes, intermediate care facilities, physicians and prescribed drugs accounted for about 84 percent of Medicaid payments.

This report focuses on the characteristics of recipients and utilization of these five services. Limited findings are presented below on the racial characteristics of recipients.

Racial Data on Medicaid Recipients

Racial data were reported for 10.6 million recipients (slightly more than half of the total). About 6 million recipients were White and 4.6 million (44 percent) were Negro or other races. There was a significant increase in recipients who were other than White in 1973. In 1972, other than White recipients comprised 39 percent of the national caseload and about 40 percent in New York. White recipients were more numerous for most services with their majority being greatest in long term care facilities (skilled nursing homes, mental hospitals and intermediate care facilities). Payments for Whites accounted for 70 percent of the reported data; a much larger proportion than their number.

General Hospital Inpatient Services

Nationally, in fiscal year 1973, 3.3 million persons or 16.5 percent of the Medicaid caseload received general hospital inpatient services. Almost one-third (30.8 percent) of Medicaid payments went for such services. Of the 2.7 million recipients reported by age for 48 States, 43 percent were 21-64 years of age and 26 percent were 65 years of age and older. Of the 2.2 million recipients discharged in 44 States, 32.2 percent were dependent children under 21 and 31.7 percent were adults in families with dependent children. Recipients 65 and over constituted a far less percentage of recipients discharged than those receiving the service because as witnessed by the small percentage of payments for this category, Medicare (Title XVIII) covers the bulk of payments of short-term care hospitalization with Medicaid paying for only a small amount, usually the deductible portion under Medicare. Counts based on such circumstances are specifically excluded from the following analysis.

Days of care and numbers of discharges

There were 2.8 million discharges among the 2.2 million discharged recipients for an average of 1.3 discharges per recipient. The average length of stay per discharge was about 7 days. The median length of stay was about five days. About 12.1 percent of discharges were after stays of only one day. An additional 28 percent of discharges were after stays of only 2 or 3 days. The detailed analysis below will cover only the recipient categories under 65 years of age.

Discharge data for eligibility categories under 65 years of age

Forty-three States reported a total of 2,429,304 discharges during the year. Adults in families with dependent children accounted for 36.8 percent of the discharges while dependent children under 21 accounted for slightly less; 34 percent. Recipients eligible on the basis of permanent and total disability accounted for 19.3 percent. Blind recipients who represented the smallest portion accounted for less than one percent. The average number of discharges per recipient ranged from a low of 1.16 for other title XIX recipients to a high of 1.50 for the permanently and totally disabled. (See Table A)

Table A. General Hospital Discharge Statistics by Basis of Eligibility of Recipient, 43 States, Fiscal Year 1973

Basis of eligibility	Recipients discharged	Number of discharges	Average number of discharges per recipient
Total under age 65	1,914,998	2,429,304	1.27
Blindness	14,805	20,619	1.39
Permanent and total disability	312,390	469,873	1.50
Children under 21	705,326	826,887	1.17
Adults in families	695,011	893,893	1.29
All other Title XIX recipients	187,466	218,032	1.16

Table B reflects short term hospital stays for selected eligibility categories of recipients. The median length of stay ranged from 3 days for children under 21 to 7 days for the permanently and totally disabled. Lengths

of stay for the disabled were significantly longer. One-fourth of the discharges for adults in families and dependent children under 21 were after stays of two or fewer days.

Table B. Discharges from General Hospitals by Length of Stay for Selected Eligibility Categories, 42 States, Fiscal Year 1973

Basis of eligibility	Average stay (days)	Percentile (days)				
		10th	25th	50th	75th	90th
Permanently and totally disabled	11	2	3	7	13	24
Dependent children under 21	5	1	2	3	6	10
Adults in families with dependent children	6	1	2	4	8	13

Skilled Nursing Home Services 1/

In fiscal year 1973, about 689,000 persons (3.4 percent of all Medicaid recipients) received skilled nursing home services. However, payments for such services of about $2 billion accounted for more than one-fifth (22 percent) of the Medicaid dollar. Eighty-two percent of skilled nursing home recipients were aged 65 or older and more than two-thirds (68 percent) were females. Among categories other than the aged, only permanently and totally disabled formed a sizable segment of nursing home recipients. Forty-two States, comprising about 520,000 recipients (seventy-five percent of the total medicaid nursing home caseload) reported 94 million days of nursing home care during the year. Days of care averaged 182 for each recipient. The average days of care were somewhat less than the previous year, however findings are inconclusive with sixteen States showing fewer days than in 1972 and twenty States showing more. Thirty-one percent of recipients spent more than nine months in skilled nursing homes.

Intermediate Care Facility Services 1/2/

In January 1972, payments to intermediate care facilities were defined as medical assistance payable under Medicaid. Intermediate care facilities furnish health-related care and services to individuals who do not require the degree of care provided by hospitals or skilled nursing homes. Fiscal year 1973 represents the first full year of Medicaid information for these services.

About 470,000 persons received intermediate care services in the nation in fiscal year 1973. Payments for intermediate care totalled over one billion dollars or thirteen percent of Medicaid payments. Similar to skilled nursing homes, the large proportion (77 percent) of intermediate care recipients were 65 years of age and older with the only other sizable group being the permanently and totally disabled. About two-thirds (65 percent) were females. Thirty-three States 2/ with 336,000 intermediate care facility recipients (71 percent of the national caseload) reported 71 million days of service. The average days of care per recipient were 211. Forty percent of recipients of intermediate care services spent 9 months or more in the facilities during the year.

1/ Data for skilled nursing home services are somewhat inflated because Michigan included data for intermediate care services. Conversely, intermediate care data are somewhat deflated.

2/ Intermediate care facility services are optional Medicaid services. Reports from Connecticut, Hawaii, Missouri, New Hampshire, New Jersey, North Carolina, North Dakota, West Virginia, Puerto Rico and the Virgin Islands indicated no intermediate care services. Thus, the universe of ICF States was forty-one.

Physicians' Services

There were 13.5 million recipients of physicians' services in 1973. Payments for physicians' services totalled over nine hundred million dollars, about eleven percent of all vendor payments. Sixty-three million physicians' visits were reported for 11.2 million recipients by 45 States. Over sixty percent of the reported visits were office visits; a significant increase in this proportion over 1972. Twenty-three percent of visit were with inpatients in hospitals or other institutions. As shown in Table A, there are variances in the numbers and places of visits by eligibility category. For the aged 65 and over, a higher proportion of physicians' visits were with inpatients (44.8 percent) than at the physicians' office.

Table C. Selected Statistics on Physicians' Services by Basis of Eligibility of Recipient, 45 States, Fiscal Year 1973

Basis of Eligibility	Number of recipients of physicians' services	Number of physicians' visits	Average number of physicians' visits per recipient	% of visits at office
Age 65 and over	1,802,712	14,349,492	8.0	44.5
Blindness	58,402	473,760	8.1	64.4
Permanent and total disability	918,361	9,054,451	9.9	57.6
Dependent children under 21	5,130,223	20,341,203	4.0	66.0
Adults in families with dependent children	2,371,036	15,056,025	6.3	70.5
Other Title XIX recipients	802,879	3,129,960	3.9	54.4

Prescribed Drugs

Forty-one States representing 10.1 million recipients (82 percent of the total) reported 106 million drug prescriptions filled for an average of 10 per recipient. Forty percent of drug prescriptions were for recipients aged 65 and over. As shown in Table D, recipients aged 65 and over averaged more than 21 drug prescriptions during the year. High volumes of drug prescriptions were provided also to the disabled (21) and blind (19.1). Although prescribed drugs are not provided under all State Title XIX programs (Alaska, Arkansas, South Dakota and Wyoming reported no prescribed drugs), the service was received by over 61 percent of the national caseload. Payments for such services constituted seven percent of Medicaid expenditures.

Table D. Selected Statistics on Prescribed Drugs by Basis of Eligibility of Recipient, 40 States, Fiscal Year 1973

Basis of eligibility	Number of recipients of prescribed drugs	Number of drug prescriptions	Average number of prescriptions per recipient
Age 65 and over	1,946,612	42,230,485	21.7
Blindness	61,630	1,176,324	19.1
Permanent and total disability	931,877	19,543,059	21.0
Dependent children under 21	4,072,778	17,055,177	4.2
Adults in families with dependent children	2,311,163	21,868,411	9.5
Other Title XIX recipients	690,166	3,489,243	5.1
